

# Business Lifecycle of Electronics in New York City

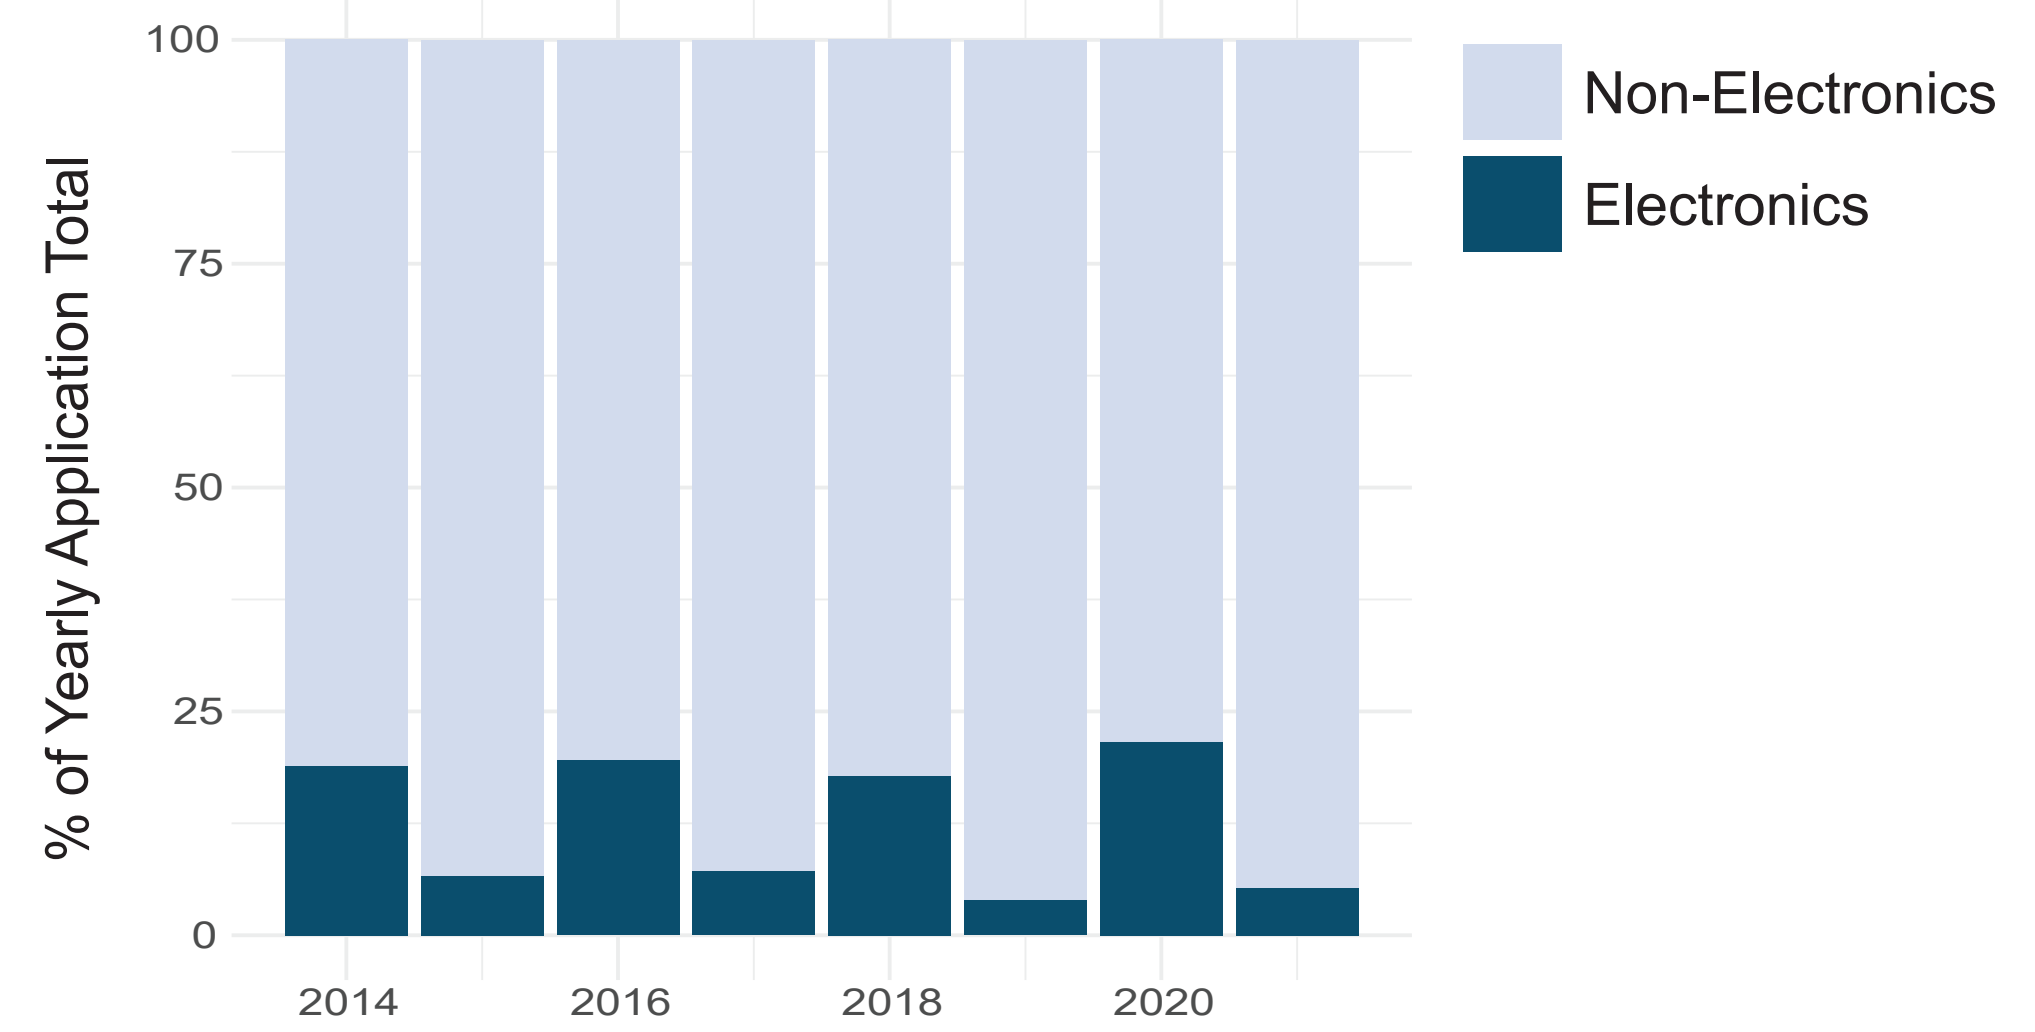

Eric R. Pfeiffer

IST 719 Information Visualization

The Department of Consumer and Worker Protections (DWCP) oversees applications for business licenses in New York City. There are two types of licenses related to electronics: One for selling them and another for servicing/repairing them.

What can these applications tell us about the lifecycle of electronics within NYC? What does the relationship between these two types of businesses look like from an administrative perspective? How might these business/administrative decisions affect consumers?

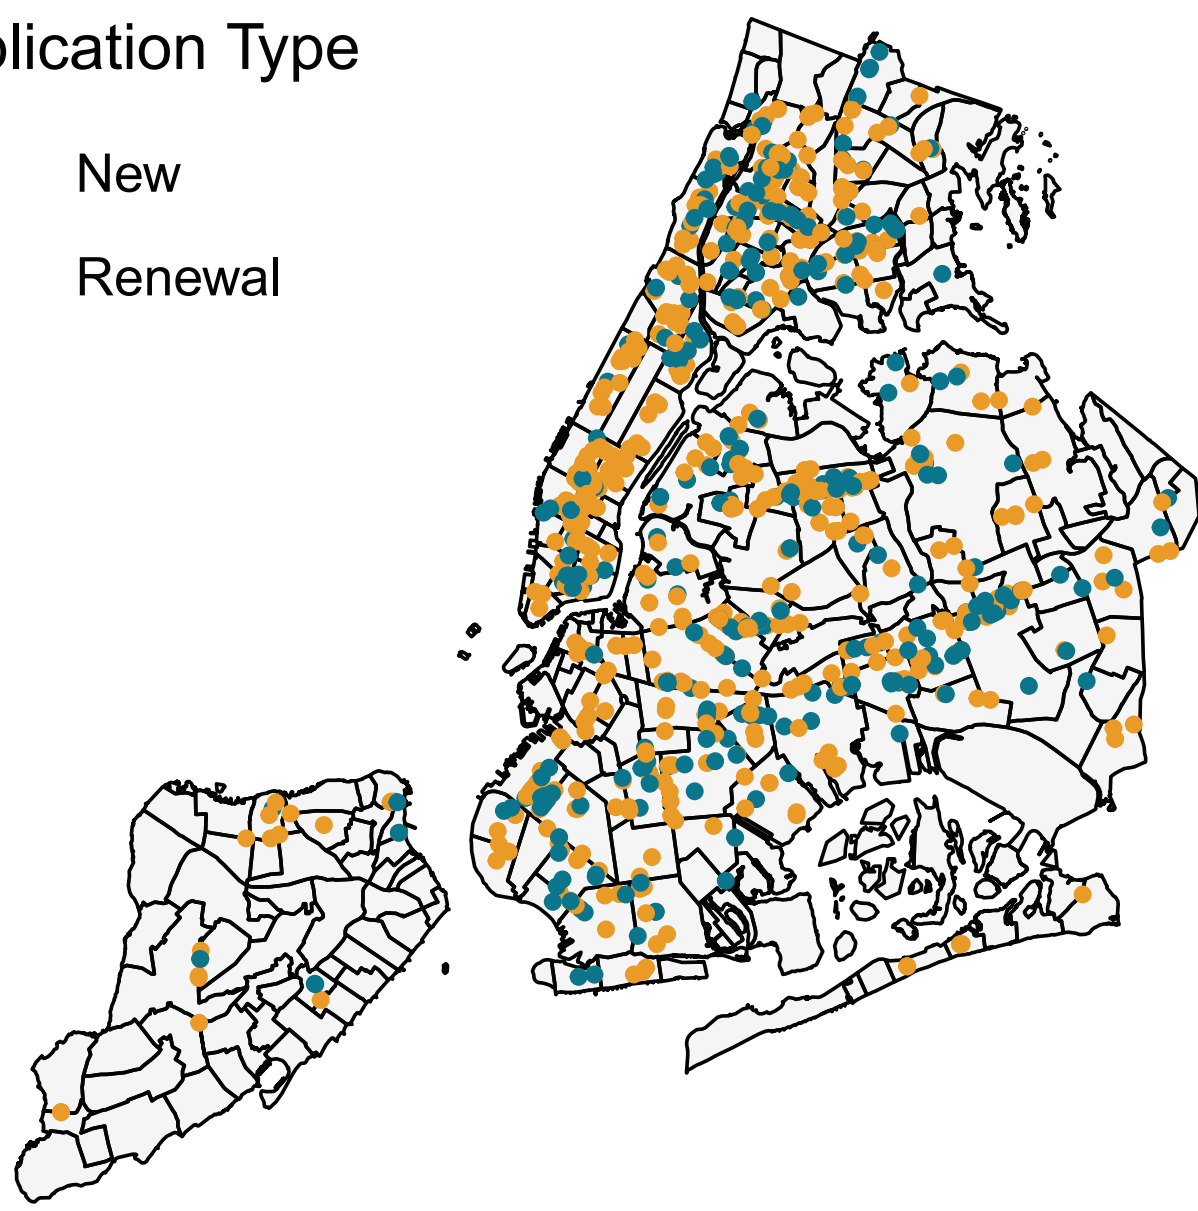

Yearly % of Applications for Electronics-Related Licenses

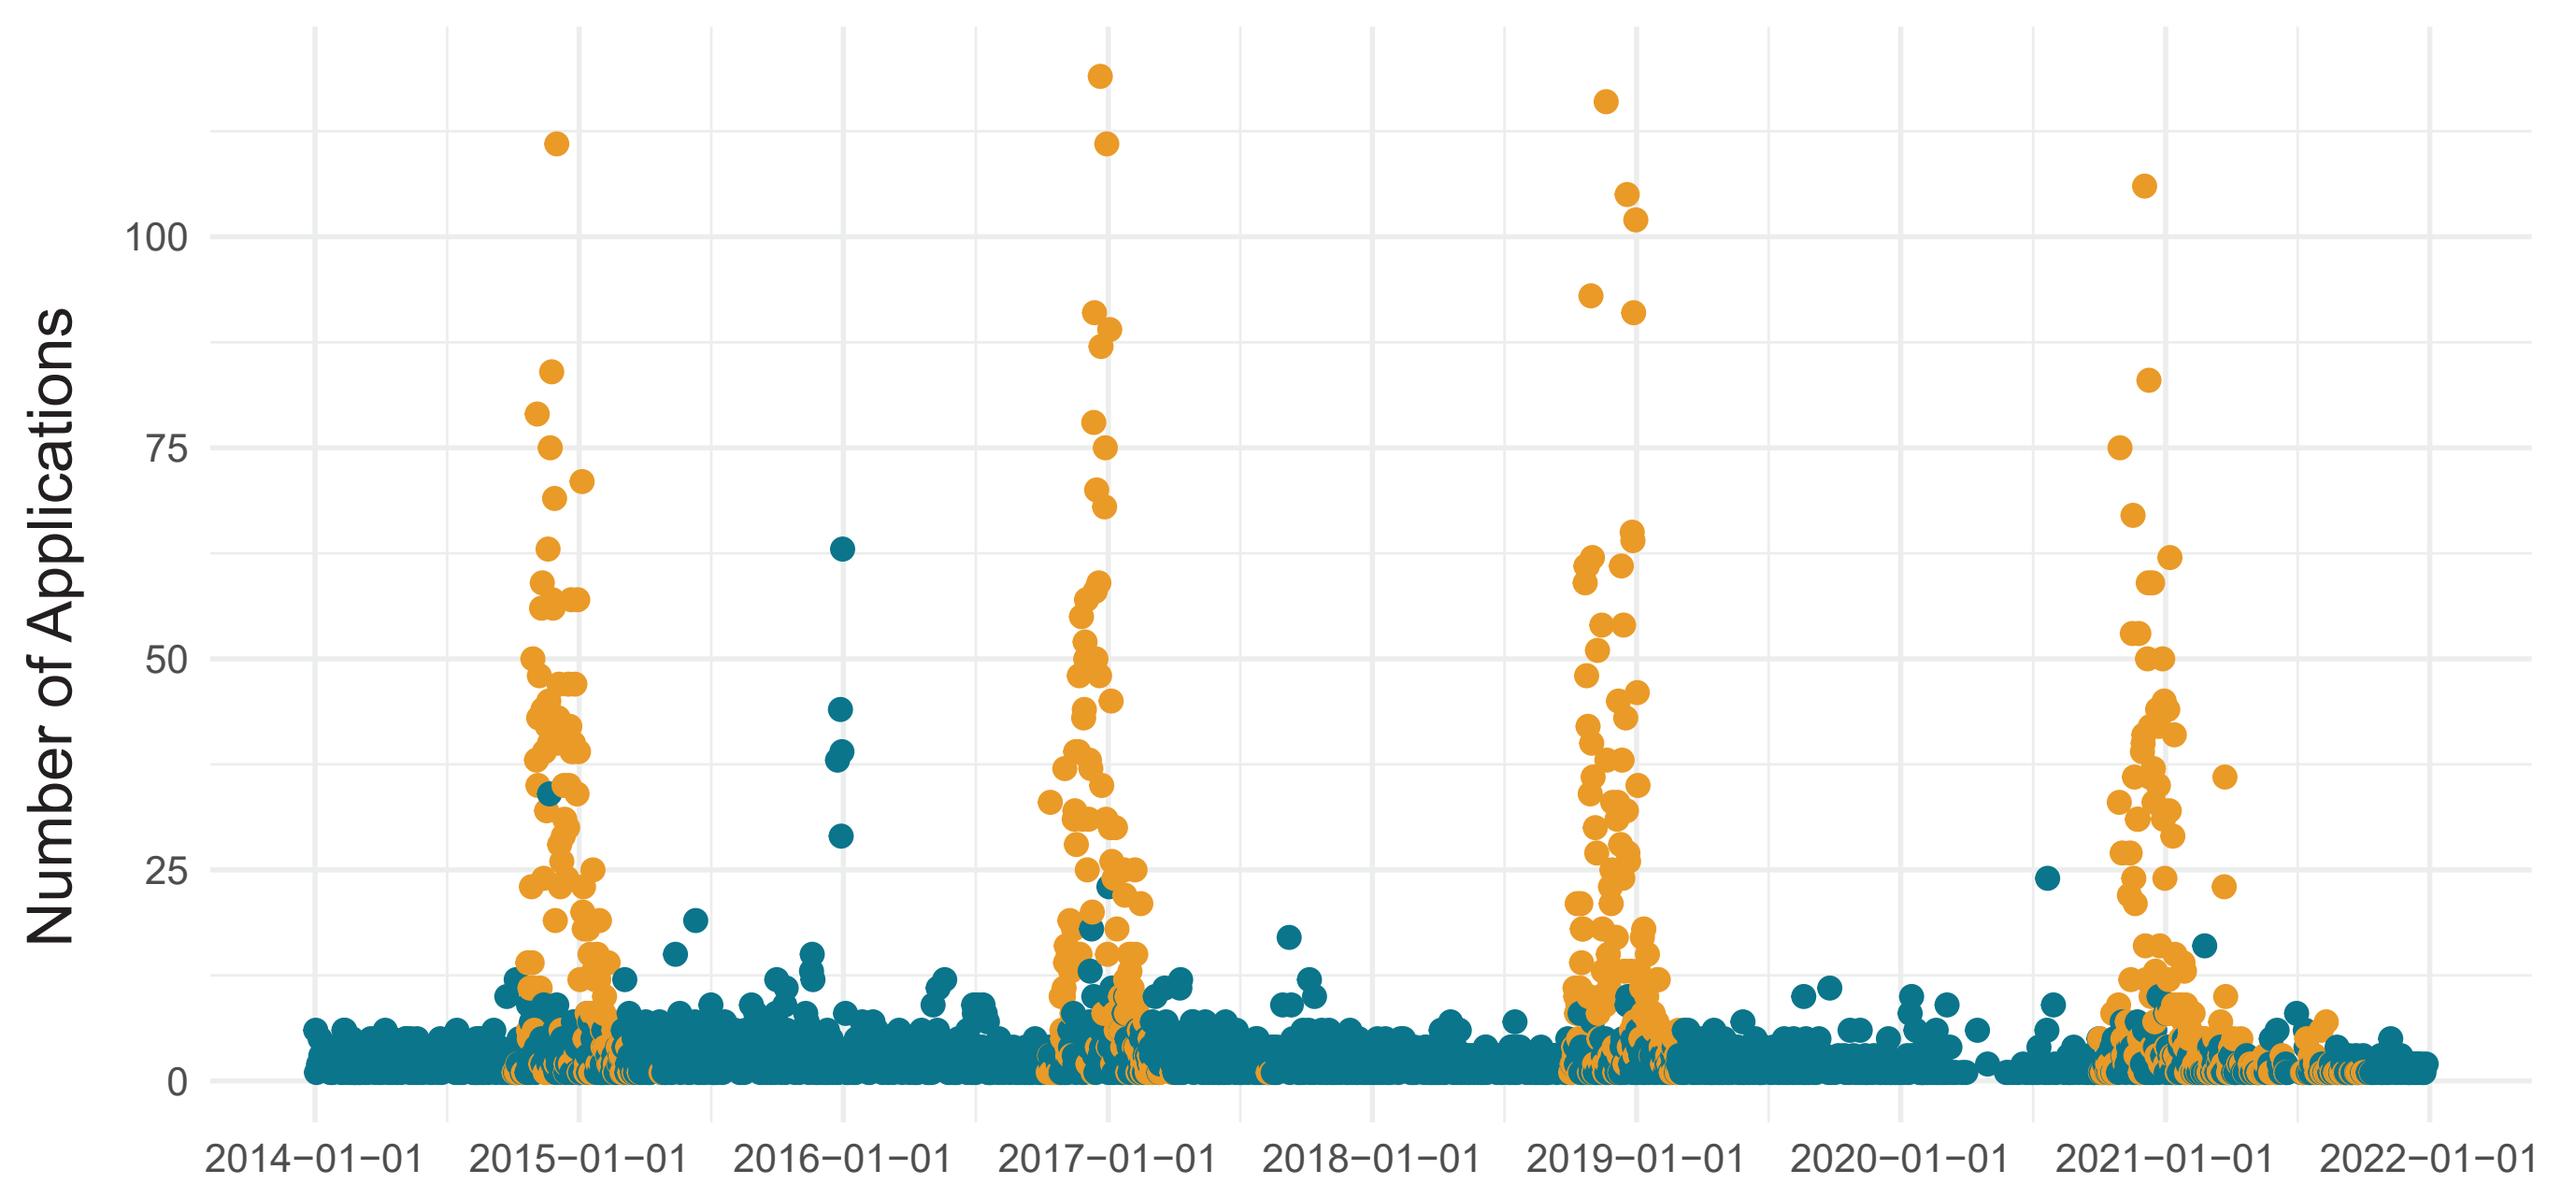

## Electronics Store Locations

Application Type

- New
- Renewal

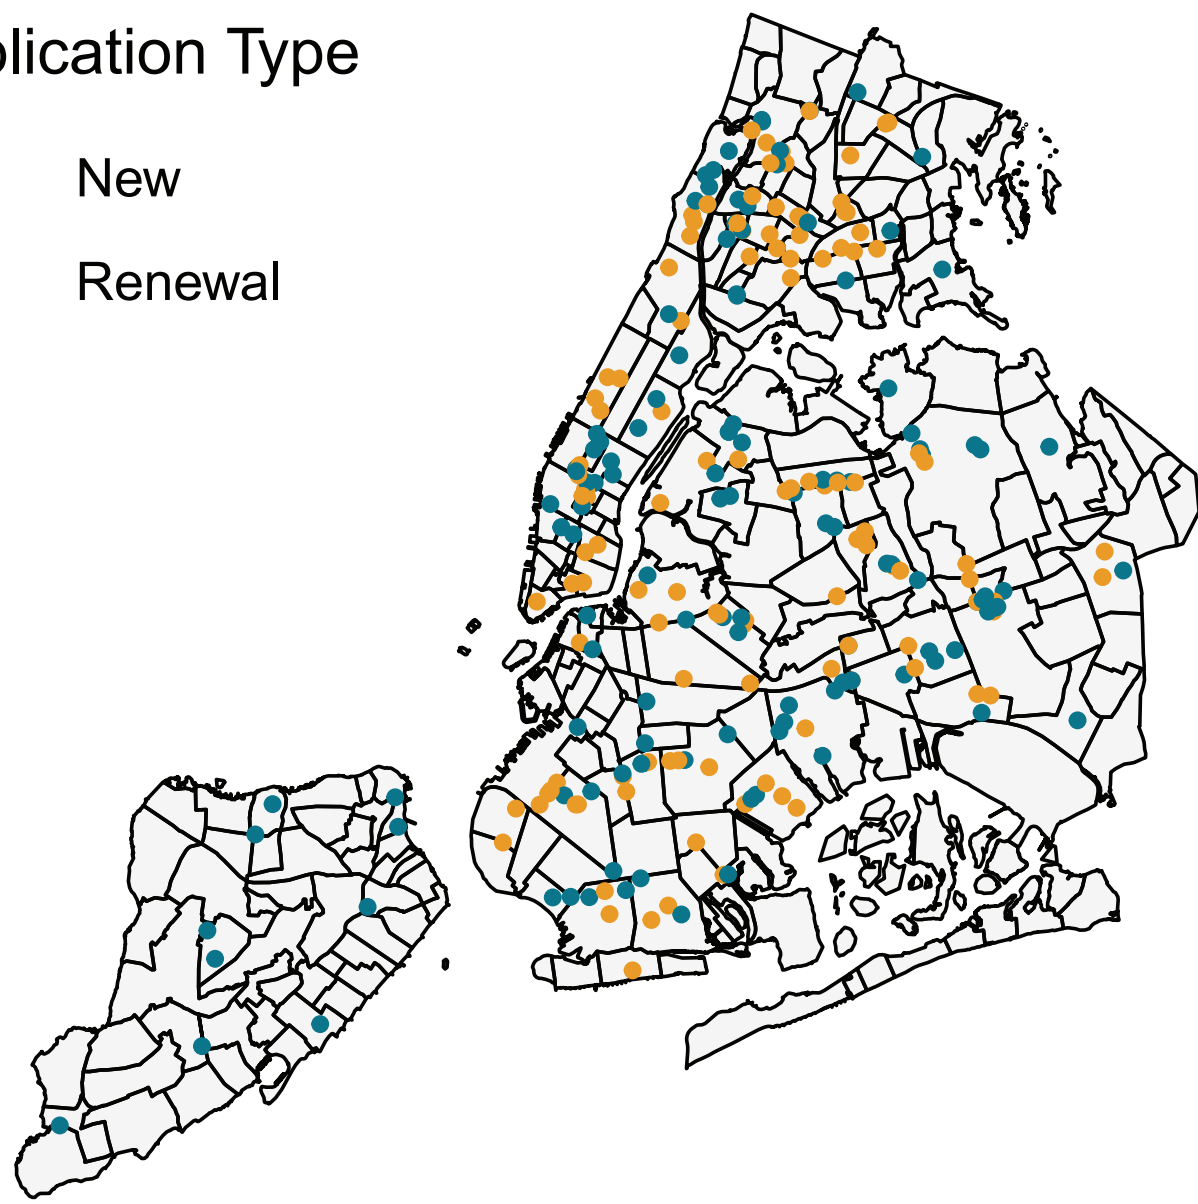

## Total Number of Applications filed per Day for Electronics Store License

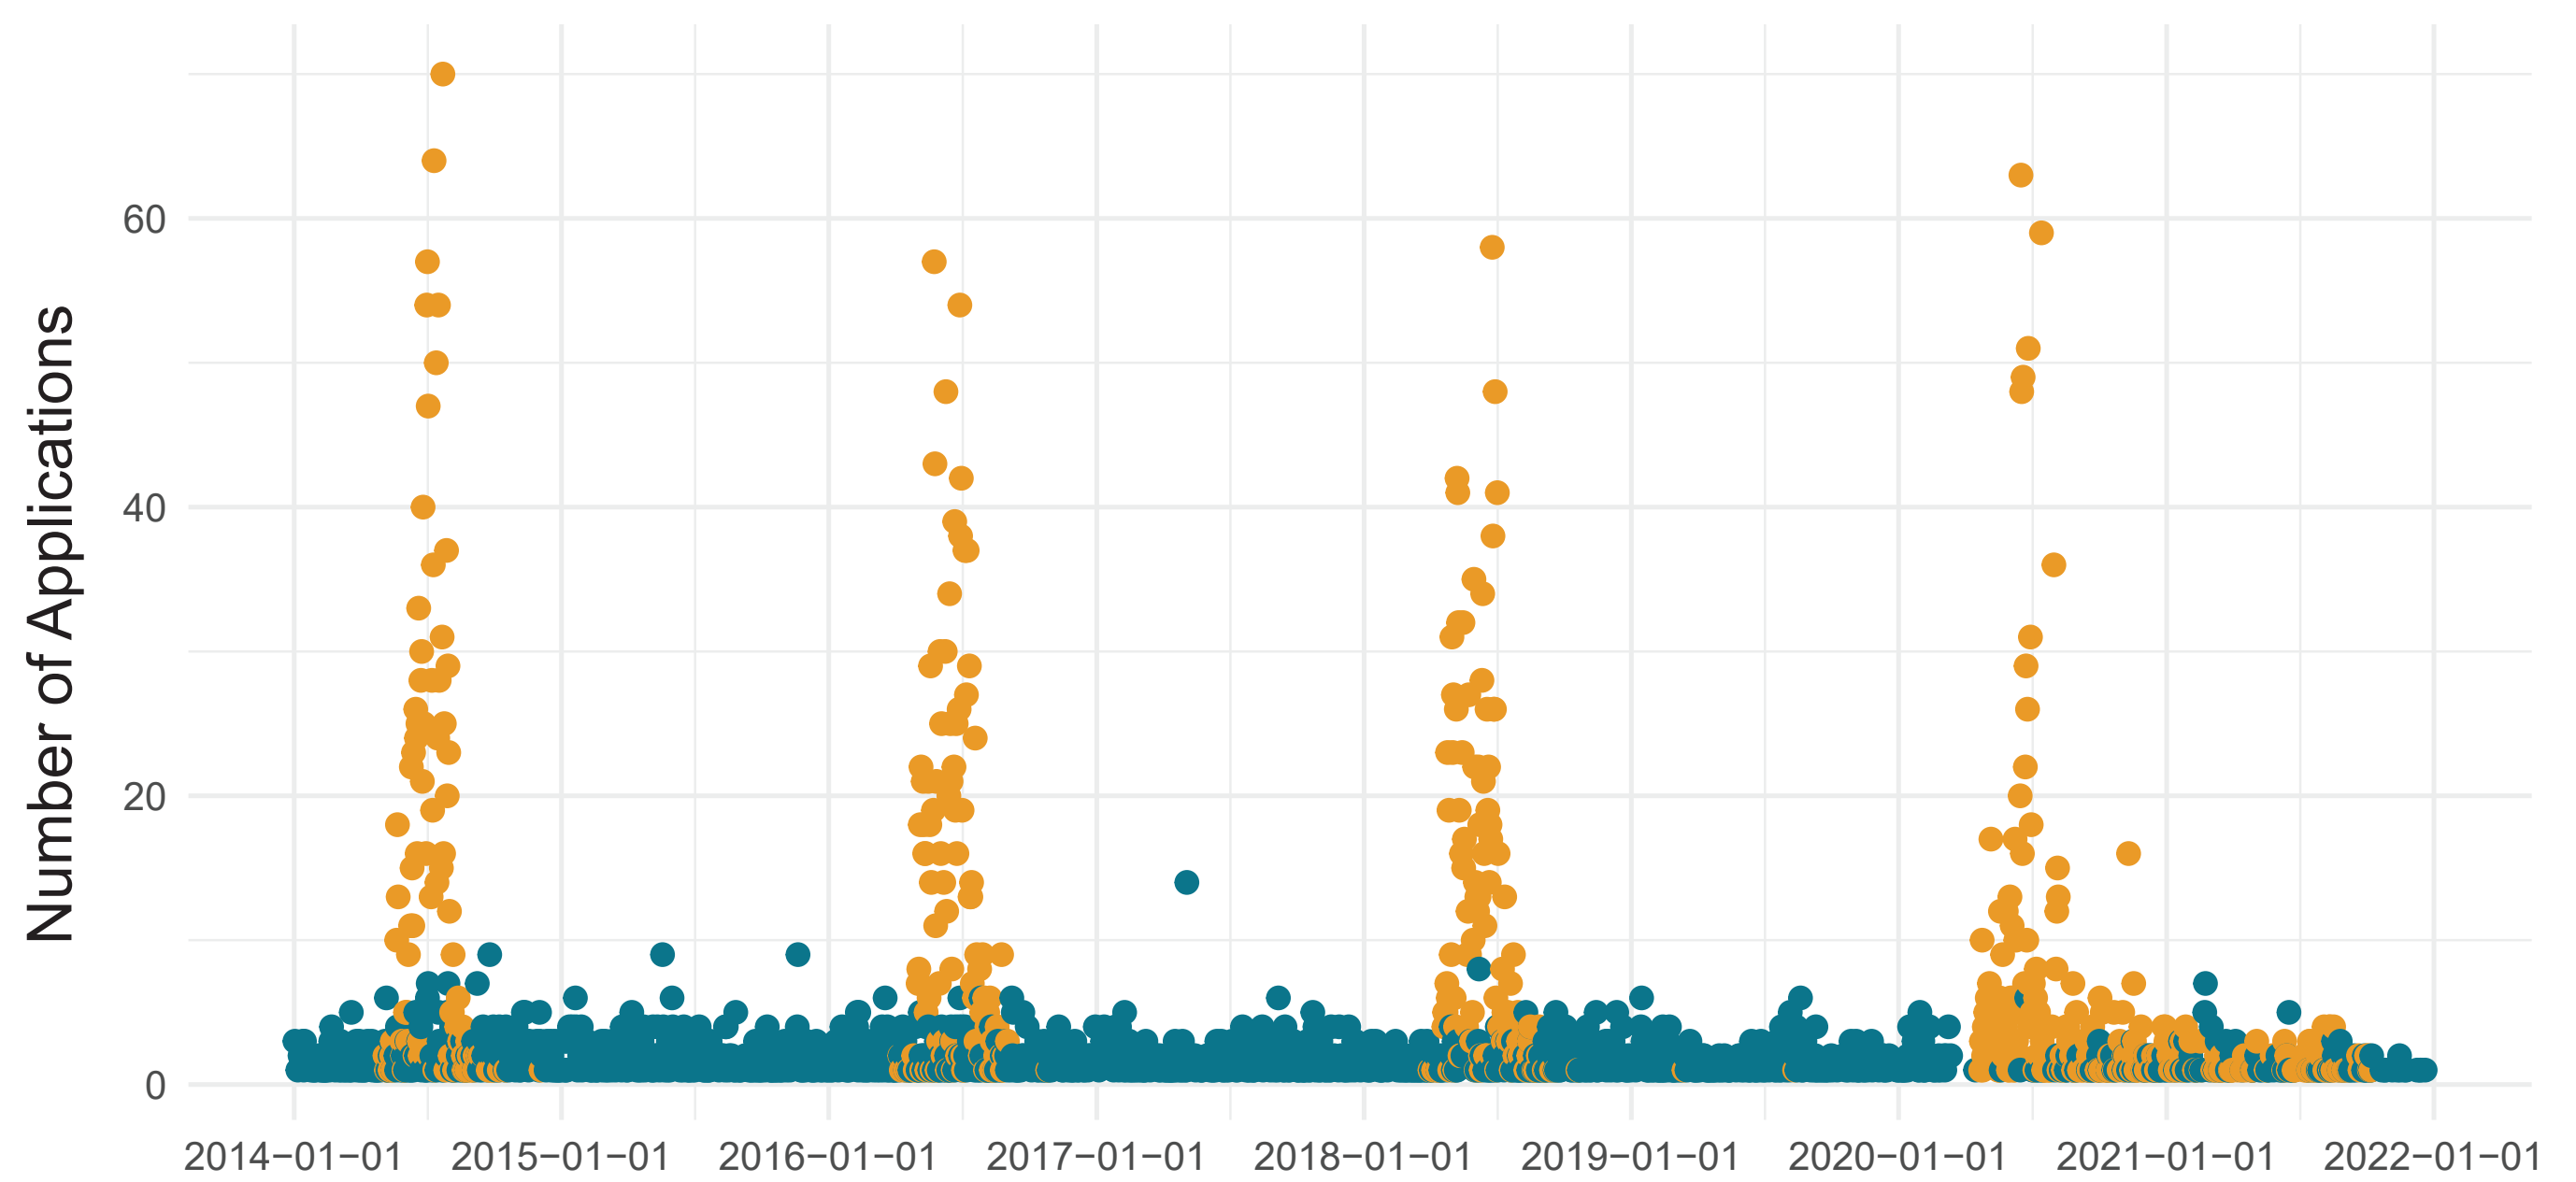

## Electronics/Appliance Repair Locations

Application Type

- New
- Renewal

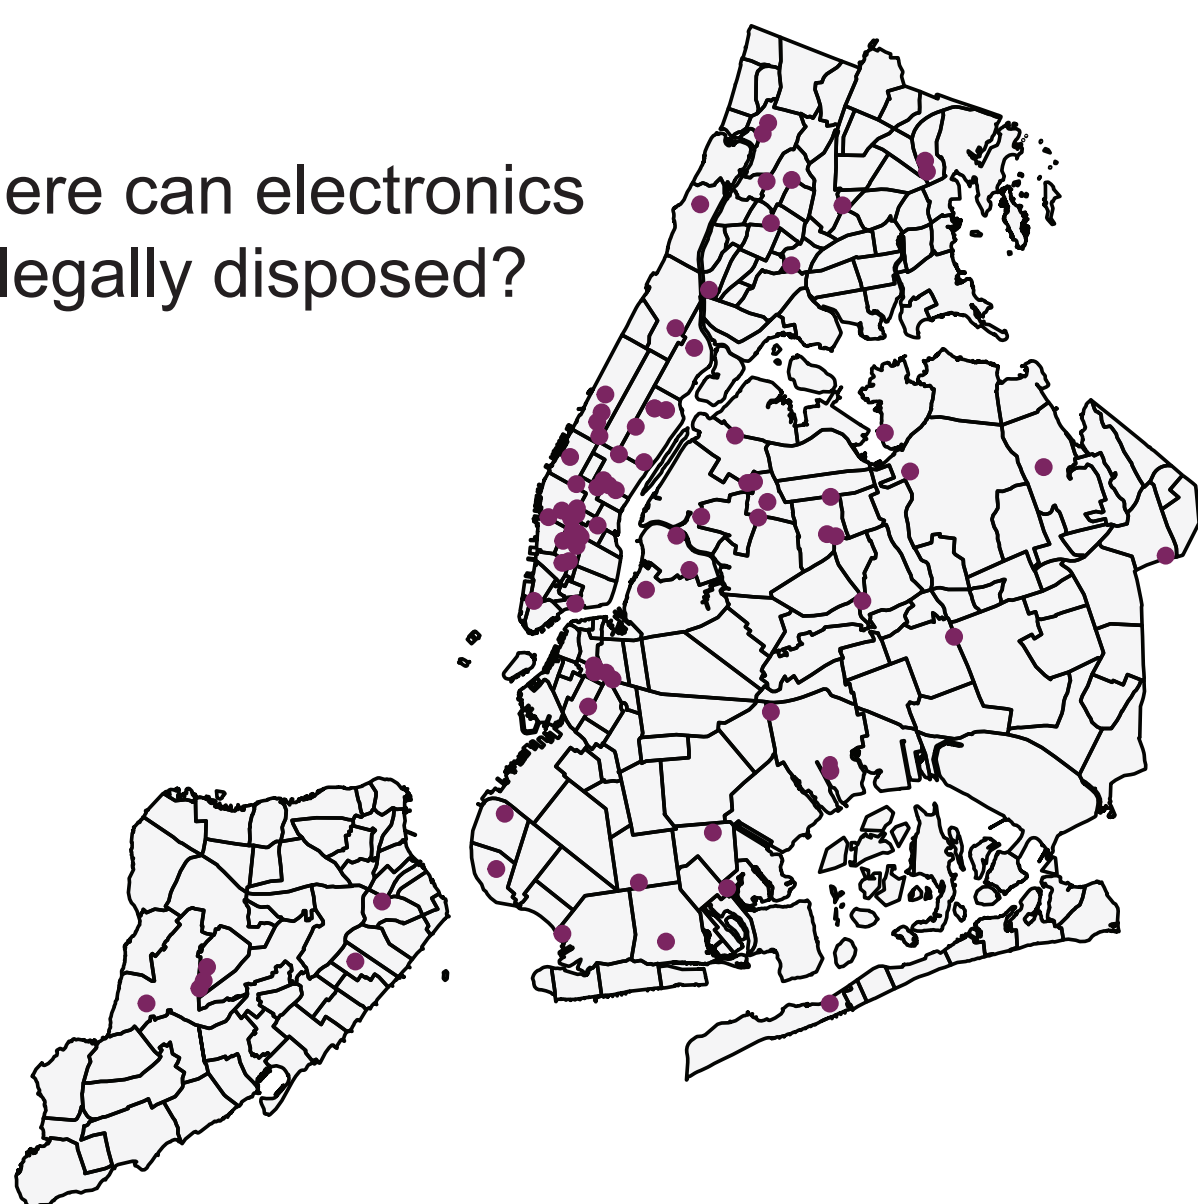

## Total Number of Applications filed per Day for Electronics/Appliance Repair License

## Electronics Drop Off Locations

Where can electronics be legally disposed?

## Average Number of Days between Application Start Date and Approval Date
